GUNTERT PAVING SCHOOL

RIPON, CALIFORNIA
FEBRUARY 11-15

G&Z Paving School has been teaching industry leading contractors for over 20 years. The curriculum includes hands-on controls and troubleshooting as well as dowel bar inserter and stringless classes. G&Z's program is designed to assist contractors in preparing to have a busy and profitable concrete construction season. Each class provides valuable knowledge that will make a difference throughout the year.

Every year G&Z's engineering, service, and sales management teams make themselves available to attendees who have questions or challenges. This face to face interaction allows for stimulating conversation that benefits all of the contractors attending. G&Z believes that one of the most beneficial aspects of paving school is the contractor to contractor networking. G&Z has designed into its curriculum specific times for interaction between attendees. These fruitful times allow for discussion and problem solving.

With the bidding table getting more aggressive, a properly educated crew can make all of the difference. Consider sending your team to G&Z Paving School.

WHO SHOULD ATTEND?

The 2013 Paving School Program is geared toward operators, mechanics, and those that troubleshoot machine challenges.

In 2013, Guntert & Zimmerman (G&Z) will be offering two tracks – EGON: Plus+1 Controls (S600 & New S850s) & MC300 (Pre-2010 S850 and S1500). Classes are scheduled throughout the week. Depending on the date of registration and the needs of the crew, a G&Z representative will contact you to ensure proper scheduling and availability.
